Schottky Diode MBRF1545CT

Datasheet

# Schottky Dual Diode

## **MBRF1545CT**

45V / 15A

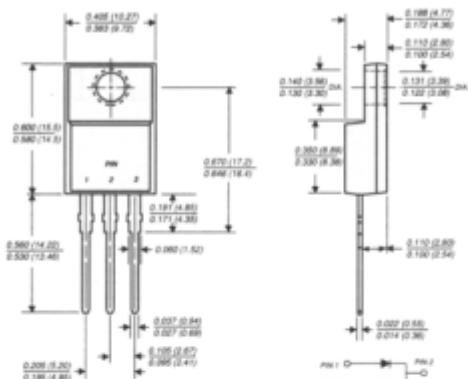

# DATASHEET

**NEW PRODUCT****NEW PRODUCT****NEW PRODUCT****MBRF1535CT THRU MBRF1560CT****SCHOTTKY RECTIFIER***Reverse Voltage - 35 to 60 Volts      Forward Current - 15.0 Amperes***ITO-220AB****FEATURES**

- ♦ Plastic package has Underwriters Laboratory Flammability Classifications 94V-0
- ♦ Metal silicon junction, majority carrier conduction
- ♦ Low power loss, high efficiency
- ♦ High current capability, low forward voltage drop
- ♦ High surge capability
- ♦ For use in low voltage, high frequency inverters, free wheeling, and polarity protection applications
- ♦ Dual rectifier construction, positive center tap
- ♦ Guardring for transient protection
- ♦ High temperature soldering guaranteed: 250°C/10 seconds, 0.25" (6.35mm) from case

**MECHANICAL DATA****Case:** ITO-220AB molded plastic body**Terminals:** Leads solderable per MIL-STD-750, Method 2026**Polarity:** As marked**Mounting Position:** Any**Mounting Torque:** 5 in. - lbs. max.**Weight:** 0.08 ounces, 2.24 gram**MAXIMUM RATINGS AND ELECTRICAL CHARACTERISTICS**

Ratings at 25°C ambient temperature unless otherwise specified.

|                                                                                                                                | <b>SYMBOLS</b>    | <b>MBRF1535CT</b> | <b>MBRF1545CT</b> | <b>MBRF1550CT</b> | <b>MBRF1560CT</b> | <b>UNITS</b> |
|--------------------------------------------------------------------------------------------------------------------------------|-------------------|-------------------|-------------------|-------------------|-------------------|--------------|
| Maximum repetitive peak reverse voltage                                                                                        | V <sub>RRM</sub>  | 35                | 45                | 50                | 60                | Volts        |
| Maximum working peak reverse voltage                                                                                           | V <sub>RWM</sub>  | 35                | 45                | 50                | 60                | Volts        |
| Maximum DC blocking voltage                                                                                                    | V <sub>DC</sub>   | 35                | 45                | 50                | 60                | Volts        |
| Maximum average forward rectified current at T <sub>C</sub> =105°C                                                             | I <sub>(AV)</sub> |                   |                   | 15.0              |                   | Amps         |
| Peak repetitive forward current at T <sub>C</sub> =105°C per diode (rated V <sub>R</sub> , 20KHz sq.wave)                      | I <sub>FRM</sub>  |                   |                   | 15.0              |                   | Amps         |
| Peak forward surge current 8.3ms single half sine-wave superimposed on rated load (JEDEC method)                               | I <sub>FSM</sub>  |                   |                   | 150.0             |                   | Amps         |
| Peak repetitive reverse surge current (NOTE 1)                                                                                 | I <sub>RRM</sub>  |                   | 1.0               | 0.5               |                   | Amps         |
| Maximum instantaneous forward voltage I <sub>F</sub> =7.5A, T <sub>C</sub> =25°C per leg at (NOTE 2)                           | I <sub>F</sub>    |                   | —                 | 0.75              |                   |              |
|                                                                                                                                | V <sub>F</sub>    |                   | 0.57              | 0.65              |                   | Volts        |
|                                                                                                                                |                   | 0.84              | —                 |                   |                   |              |
|                                                                                                                                |                   | 0.72              | —                 |                   |                   |              |
| Maximum instantaneous reverse current at rated DC blocking voltage per leg T <sub>C</sub> =25°C (NOTE 2) T <sub>C</sub> =125°C | I <sub>R</sub>    | 0.1               |                   | 1.0               |                   | mA           |
|                                                                                                                                |                   | 15.0              |                   | 50.0              |                   |              |
| Voltage rate of change, (rated V <sub>R</sub> )                                                                                | dV/dt             |                   |                   | 10,000            |                   | V/μs         |
| Maximum thermal resistance per leg (NOTE 3)                                                                                    | R <sub>θJC</sub>  |                   |                   | 5.0               |                   | °C/W         |
| Operating junction temperature range                                                                                           | T <sub>J</sub>    |                   |                   | -65 to +150       |                   | °C           |
| Storage temperature range                                                                                                      | T <sub>STG</sub>  |                   |                   | -65 to +175       |                   | °C           |

**NOTES:** (1) 2.0μs pulse width, I<sub>f</sub>=1.0 KHz  
(2) 300μs pulse width, 1% duty cycle  
(3) Thermal resistance from junction to case
